

January 31, 2014

Greetings,

BroadSoft is pleased to announce that the MiaRec Call Recording System has been formally validated with BroadWorks. The device model(s) listed below have been validated as interoperable with the BroadWorks SIP interface. Configuration details and any issues or limitations identified during the interoperability testing are documented in the BroadSoft Partner Configuration Guide (PCG) *PartnerConfigGuide MiaRec MiaRec*. The PCG is available to BroadSoft customers on the BroadSoft Xchange website, <http://xchange.broadsoft.com>.

BroadSoft validates that the device interoperates with the BroadWorks SIP interface. BroadSoft does not validate qualitative aspects of the device or other device capabilities, which are outside the scope of the SIP signaling interface.

The validation covers the MiaRec version(s) and BroadWorks release listed below. Other versions and releases tested previously are documented in the PCG.

MiaRec version 3.0.655 *
BroadWorks Release 19.sp1

*This validation also applies to all subsequent compatible maintenance releases to this device version.

Thanks,

A handwritten signature in black ink that reads "Wesley Hacker". The signature is written in a cursive, slightly slanted style.
